

Hwy "A" Reconstruction

5/3/2016

2016 Project Cost:

Planning, Design, and Engineering	TBD
Construction	TBD
Total:	TBD

2016 Project Timeline:

Pulverizing Pavement	TBD
Widening Roadway	TBD
Base Aggregate	TBD
Base Asphalt	TBD
Final Asphalt	TBD
Painting/Marking	TBD
Completion	TBD

Jefferson, WI 53549

Hwy A

STH 89 to Previous project extents

Description and Justification:

- ◆ Pavement Rating: 3 (out of 10)
- ◆ The road will be closed to thru traffic—reduced to local access only
- ◆ The project will be completed by the Jefferson County Highway Department
- ◆ Start date is yet to be determined as project is still in planning stages

Left: Hwy A existing pavement conditions, approaching Lake Mills headed East on Topel St.

Right: Hwy A existing pavement conditions, approaching Lake Mills headed Northeast along Highway A, near wildlife area

In the photos you can see cracking as a result of insufficient base aggregate and poor drainage.

Ruts have formed in the wheel paths of vehicle travel

Crumbling at the road edges is present as a result of shoulder material washing away.

The project intends to improve site drainage, pavement conditions, and reduce curvature in road
